PROFESSIONAL SUMMARY

Motivated and detail-oriented fresher with a strong foundation in Python, SQL, and Generative AI. Passionate about building AI-powered applications and scalable backend systems. Eager to apply academic knowledge and self-driven learning to real-world software development challenges. Strong problem-solving skills with a keen interest in LLMs, prompt engineering, and AI-assisted development workflows.

TECHNICAL SKILLS

Programming Languages: Python, Generative AI

Frontend: HTML, CSS

Backend & Frameworks: FastAPI, Flask, REST APIs

Databases: MySQL

AI & LLM Technologies: OpenAI APIs, Claude Code, Prompt Engineering, LLM Integration

Tools & Platform: VS Code, Git, GitHub, Docker

PROJECTS

AI-Based Placement Readiness Predictor

- Developed a full-stack AI-based Placement Readiness Predictor to evaluate students' job readiness through multiple assessment modules.
- Built an AI-powered resume analysis system that extracts candidate information and provides personalized improvement recommendations.
- Implemented Coding, Aptitude, Technical, and Mock Interview assessment modules with automated scoring and detailed performance reports.
- Designed a Machine Learning placement prediction model that estimates placement probability using assessment scores and resume insights.
- Created an interactive analytics dashboard to visualize performance trends, strengths, weaknesses, and placement readiness.
- Integrated secure user authentication, profile management, report generation, and responsive UI for an improved user experience.

GitHub: <https://github.com/Mallikarjunareddy45/placement-readiness-predictor>

AI-based Smart Doubt Management System

- Developed a full-stack AI-powered web application for managing and routing student doubts.
- Built responsive user interfaces using React.js and integrated them with backend APIs.
- Developed REST APIs using FastAPI for user authentication and doubt management.
- Integrated PostgreSQL database for storing users, questions, and application data.
- Deployed the frontend and backend on Render with cloud database integration.
- Implemented secure login, registration, and API communication between frontend and backend.

INTERNSHIP EXPERIENCE

AI & Generative AI Intern

Brainovision Solutions India Pvt. Ltd. | AIGA Program

Duration: 2 Months

- Contributed to AI and Generative AI projects by applying Machine Learning and NLP concepts.
- Worked on Large Language Model (LLM) workflows and explored parameter-efficient fine-tuning techniques.
- Implemented Prompt Engineering and Retrieval-Augmented Generation (RAG) approaches for AI-powered applications.
- Utilized LangChain to support workflow automation and agent-based application development.
- Collaborated on technical presentations, documentation, and capstone activities within a team environment.
- Strengthened problem-solving and analytical skills through practical AI use cases and project-based tasks.
- Gained exposure to Transformer architectures and modern AI development practices.

Technologies & Concepts

Python, Machine Learning, Deep Learning, NLP, Transformers, LLMs, RAG, LangChain

EDUCATION

Annamacharya institute of technology & Sciences – Rajampet

B.Tech in Artificial Intelligence and Data Science

2023-Present | CGPA:8.09

CERTIFICATIONS

- AI & Generative AI Internship Certificate – Brainovision Solutions India Pvt. Ltd.
- Python Development Certificate – Cognifyz IT Solutions Pvt. Ltd.
- Volunteer for “The Leadership Bridge – From Campus to Core IT” – T-Hub, Hyderabad.

ACHIEVEMENTS

- Developed AI-powered full-stack applications with real-world use cases.
- Completed AI & Generative AI Internship with hands-on project experience.
- Volunteered at T-Hub Hyderabad technology event.
- Earned certifications in Generative AI, and Python Development.
